📊 Ag Experience Project: Reading

Ag Science 1 · Unit 5 · Level 3 (closer to the class work) · goes with Communications: Ag Experience Topic, First 5 Slides, 10 Slides, Final Ag Experience; Ag Exp. Journal; AET

Name: _____

Planning a Strong Ag Experience

An Ag Experience is a hands-on work or research project about agriculture that you plan and carry out. In FFA it is called an SAE, a Supervised Agricultural Experience. No purchase is needed, and it can be something you did in the last year.

Start by listing three topic ideas, then choose one. Ideas include raising animals (chickens, rabbits), growing plants (a garden or hydroponics), food science (making cheese, jam or bread) or ag mechanics (fixing a farm tool). A parent or guardian approves the topic.

Next, write a clear goal. Good goals start like “Learn the process of…”, “Teach the class how to…” or “Design an area for…”. A goal tells what you will learn, make or teach.

Keep a work log every time you work: the date, what you did, how many minutes, and a photo. This record is like the AET (Agriculture Experience Tracker), the online log FFA members use for hours and money.

Finally, build slides and present. The class makes 10 slides and talks 4-5 minutes; the modified version is 6-8 slides and 2-3 minutes, and you may pre-record. Every slide needs an image with its source. The rubric grades duration, organization and design, explanation of your goal and plan, and progress toward the goal.
