🍎 Final Review: Reading

Ag Science 1 · Unit 8 · Level 3 (closer to the class work) · goes with Final Part 1 The AET + Final Kahoot (our own review)

Name: _____

Ag Science 1 in Review

Unit 1: agriculture is growing crops and raising animals for food, fiber and more. Crop rotation keeps soil healthy, and herbicides kill weeds. Whatcom County leads Washington in red raspberries and is a top dairy and seed-potato county. Exports are sold to other countries.

Unit 2: Bedlington Farms grows certified seed potatoes. Washington's wheat is mostly soft white wheat, and most is exported. Washington grows more than half of U.S. apples; Cosmic Crisp was bred at WSU from Enterprise × Honeycrisp, and grafting keeps a variety true.

Unit 3: each U.S. farmer feeds about 154 people, about 97% of farms are family-owned, and farmers get about 16 cents of each food dollar. Precision ag raises yields and lowers costs. Unit 4: FFA has the three-circle model (class, SAE, FFA), the motto, the emblem (the owl means wisdom) and CDEs and LDEs.

Unit 5: the Ag Experience (SAE) needs a topic, a clear goal and a work log; the AET (Agriculture Experience Tracker) records hours and money. Unit 6: Holsteins are about 80% of registered dairy cattle; oxytocin causes milk let-down; pasteurizing kills bacteria and homogenizing breaks up fat.

Unit 7: livestock judges place four animals using muscle, structure, balance and condition. Market animals are judged most on muscle; breeding females on femininity and soundness.
