Unit 1: Self-Advocacy and Goal Setting

[start date] to [end date]

Ferndale High School

SAMPLE - replace the [brackets]

Learned	Friday	Try at Home	Dates	Question

What We Learned

Self-advocacy means asking for what you need. This unit, we practiced solving problems. We learned a 4-step plan: 1. Name the problem. 2. Think of two options. 3. Pick the best option. 4. Try it. We also sorted big problems and small problems. We talked about who can help: a teacher, a classroom aide, the nurse, or a counselor.

Key Words

Problem: something that is hard or not working
Option: one choice you can make
Choose: to pick one thing
Ask: to say what you need

Project Spotlight

Next, we start a One-Page Profile. It is a page that shows what a student is good at and what helps them learn. Students will use it to tell others what they need. We will also set one home goal and one school goal.

[Project picture: blank template, no names, no faces]

Friday Cooking Lab or Community Outing

On Fridays, we cook a simple recipe or visit a place in the community. We start with a safety check. Students wash hands for 20 seconds. Then we work as a team, share food, and clean up.
This Friday: [recipe or place].
Please tell us about any food allergies.

Try It at Home

Try the 4-step plan on one small problem.
1. Name the problem. 2. Think of two options.
3. Pick one. 4. Try it.
Give your student time to try. Pictures and pointing are fine.
Tell us how it went. A check mark is enough.

Dates and Reminders

[date]: Friday cooking lab or outing: [what]
[date]: [form or item due]
Oct 29: Unit 1 ends
[date]: Next newsletter

Quick Question

Ask your student: Is this a big problem or a small problem?
Tell us: How does your student ask for help at home?
Words, signs, pictures, and devices all count.
