👩‍🏫 Staff Guide · Small Engines Overhaul · Unit 5 Carburetion & Fuel (Level 1)

Level 1 = about 2nd-grade reading, with emoji and pictures. SLE students stay in the class teacher's lesson and use these pieces next to it: same topics, same order, same points.

1. How the pieces line up

Gen ed piece (Canvas: “Weeks 4-5: Carburetor Handout + Carburetor Article, Carburetor Video Handout, Carburetor Quiz, Venturi Lab, iCADEMY Bronze 8 Carburetion, iCADEMY fuel/oil topics (Stihl oil through ethanol in today's fuel)”)	**Level 1 piece**
Carburetor Handout + Article (scanned)	Deck + notes A-C; L3 reading replaces the article
Carburetor Video Handout (2 YouTube videos)	Video guide
Carburetor Quiz (paper, no key in export)	Quiz + key (team-written key)
Venturi Lab (title only)	Venturi & Carburetor lab packet (team-written)
iCADEMY Bronze 8 + fuel/oil/ethanol	Our own slides 'Fuel and Oil Care' (no STIHL content)
Class slides	Deck: 13 slides, Words to Know first, “point to the picture” checks, recap
His worksheets (grouped into lessons)	Guided notes: 15 items + key
Class quiz / notes check	Quiz: 8 questions + key
Vocabulary	8 picture cards (cut apart)
—	1 game on the class site: 10 questions + a matching round

2. Supports built in

- **Read aloud** every line; student may point, say, or circle (point = full answer)
- One idea per slide; big pictures; 2–3 picture choices
- Clear carburetor model or cutaway if available
- Straw-and-paper demo of the venturi

3. Add these as the IEP allows

- Read-aloud · extended time · separate setting
- Printed slides · videos paused at the “look for” part
- Cover one choice to make it 2

4. What to grade

- Carburetor Quiz: in class the quiz is open-notes; let students use their guided notes
- **Notes**: same points as his worksheets for that lesson when complete.
- **Quiz**: score, then scale to the class points.
- These are **modifications** (less content). The IEP must allow modified grading. Check with the case manager.

5. Who to ask

- Mr. Driver (SLE): changes and IEP questions.
- Facts we could not confirm in his files say “check with the class teacher”.

🚧 Under construction (check with the class teacher)

- **Venturi Lab**: Title only in Canvas; our lab is team-written.
- **Carburetor Article**: Scanned image, source unknown; our reading replaces it.
- **Carburetor Quiz key**: The paper quiz has no key in the export; our key is team-written.

⚠️ Shop safety (with adult supervision)

- **Tools**: students may use all shop tools (hand tools, measuring tools, flywheel puller, valve tools, torque wrench, power tools) **with adult supervision**. Staff model first, stay at the bench, and count tools back in.
- **Eyes and body**: safety glasses on in the shop at all times; coveralls, closed-toe shoes, no loose clothing, long hair tied back, no dangling jewelry.
- **Fuel and oil**: gasoline is flammable. Drain fuel with adult supervision, outside or in a ventilated area, no sparks or flames nearby. Oily rags go in the metal safety can. Gloves for oil; wash hands after.
- **Exhaust**: engines are only started with adult supervision in a well-ventilated area or outdoors (carbon monoxide). Hot mufflers and cylinders burn: let parts cool.
- **Springs and sharp edges**: valve springs and rewind starter springs store energy; use the right tool with adult supervision and eyes protected. Blades, flywheel fins and piston rings can cut.
- **Before working on an engine**: disconnect the spark plug wire so the engine cannot start.
- **Lifting**: engines are heavy; lift with a partner, bend the knees. Car lifts, jacks and 18-wheeler work are video topics in this class.
- **Clean-up**: wipe spills right away (slips), sweep, return every tool to its spot.
