📖 Ignition: Vocabulary Picture Cards (Level 2)

Name: _____

Cut on the dashed lines. Use the cards to match, sort, or quiz a partner.

Spark plug

The part that makes a spark across its gap to light the air-fuel mix.

Magneto

The ignition system that uses flywheel magnets and a coil to make high voltage, no battery needed.

Armature (coil)

The coil mounted beside the flywheel that turns the magnets' energy into a high-voltage spark.

Air gap

The small space between the armature and the flywheel magnets, set with a gauge card.

Spark plug gap

The space between the plug's center and side electrodes, set with a gap gauge.

Flywheel key

A soft metal key that holds the flywheel in the right position for spark timing.

Kill switch

A switch or wire that grounds the coil to stop the spark and shut off the engine.

Spark tester

A tool clipped between the wire and ground to safely see if there is a spark.
