# Plant Names & Life Cycles

## TODAY'S PLAN

- 🏷️ Scientific names
- 🌼 Flower classification
- ⏳ Life cycles
- ☠️ Poisonous plants

Review · 5 minutes

# Quick Review

🌱 Name the 4 branches of horticulture.

👩‍🌾 Name one indoor plant job.

🤔 Why do plant sellers need plant knowledge?

Words to Know

# Words to Know

## Scientific name

A two-word Latin name used by scientists everywhere (genus + species).

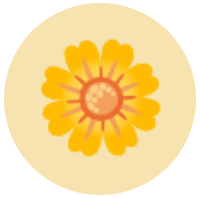

## Genus

The first word of a scientific name. It starts with a capital letter.

## Species

The second word of a scientific name. It starts with a lowercase letter.

## Simple flower

A single flower with petals around the center, like a tulip.

Words to Know

# More Words to Know

🎺 **Tube flower**: A flower whose petals join into a tube, like a snapdragon or fuchsia.

🌻 **Composite flower**: A flower head made of many tiny flowers, like a sunflower or daisy.

1️⃣ **Annual**: A plant that grows, flowers, makes seed and dies in one growing season.

2️⃣ **Biennial**: A plant that grows leaves the first year and flowers and makes seed the second year.

Learn

# Scientific Names

Scientific names are written in **Latin**.

Two words: **genus** + **species**. Sunflower = *Helianthus annuus*.

Same name in every country, so there is no confusion.

Learn

# The Rule

Genus starts with a **capital** letter; species is all **lowercase**.

Write it in *italics* (or underline it by hand).

Mustard: *Brassica rapa*.

🃏 Check 1 of 4

# Which is written correctly?

**Hold up 1, 2, or 3:**

1️⃣ brassica Rapa

2️⃣ Brassica rapa (Brassica capital, rapa lowercase)
