Staff / Para Guide — Cooking Lab, Fri 11/6, 7th Period

Goal: Students follow a recipe, measure, use kitchen safety, and clean up with wash-rinse-dry.

Before class

- Preheat the oven by 10:55. Fill the pasta pot and start it heating at 10:55 (big pots take ~10 min to boil).
- Set out stations: pasta, sauce, pan building, mug cake station (dry and wet items), sink (3 tubs or sink sides).
- Label mugs with two-letter codes on tape.

Who does what

- **Staff only:** oven door, draining pasta, cutting the pan, stove when beef is browning, checking the meat is no longer pink.
- One staff at the microwave the whole cake window. One staff on the sink team.

Allergens: check before Friday

Allergen	Where it is	Swap
Gluten (wheat)	spaghetti, cake mix	gluten-free spaghetti (cook in a separate pot), gluten-free boxed cake mix in a clean mug and spoons
Dairy (milk)	mozzarella, parmesan, many cake mixes, some frosting	dairy-free shreds or no cheese on one corner; a dairy-free cake mix (check label)
Egg	none added (mug version is mix + water); some mixes contain egg powder — check the box	egg-free mix if needed

⚠️ **Read the cake mix box allergen label** (wheat, milk, egg, soy are common) before Friday. | Others | soy (some sprinkles, oil), meat preferences | read labels; make one pan meatless if needed |

Make the swap version first and keep its tools separate. Pepper/mushroom limits apply to home meals only, not this lab.

Hot-item watch

Microwave mugs can reach very hot temperatures in the middle. Students use a mitt and wait 2 minutes. Never more than 90 seconds per cake; overheated batter can bubble over.

Talking to students

Use plain, adult directions: "Set the timer for 9 minutes." Praise the skill, not the person: "You leveled that spoon well." No baby talk.

Data to note

Who measured independently, who needed prompts on hand washing, who did each wash-rinse-dry step without prompts.
