👩‍🏫 Staff Guide · Chemistry · Unit 1A Charges & Static (Level 1)

Level 1 = about 2nd-grade reading, with emoji and pictures. SLE students stay in Mr. Brittle's lesson and use these pieces next to it: same topics, same order, same points.

1. How the pieces line up

Gen ed piece (Canvas: "Unit 1 Lightning: L1.1 Initial Model of Lightning, L1.2 Smaller Scales, L1.3 Sparks, L1.5 Particle Model of Static, L1.6 Cause of Static")	**Level 1 piece**
L1.1 Initial Model of Lightning + slides	Slides "Lightning" + notes part A
L1.2 Smaller Scales (rain/lightning graph, correlation vs causation)	Notes part A; Level 1 skips the graph
L1.3 Sparks (water dropper stations)	Static Electricity Stations lab packet + slides "Sparks"
L1.5 Particle Model of Static + L1.6 Cause of Static (reading)	Slides "Atoms", "Rubbing moves electrons" + notes parts B-C
Class slides	Deck: 18 slides, Words to Know first, "point to the picture" checks, recap
His worksheets (grouped into lessons)	Guided notes: 15 items + key
Class quiz / notes check	Quiz: 8 questions + key
Vocabulary	8 picture cards (cut apart)
—	1 game on the class site: 10 questions + a matching round

2. Supports built in

- **Read aloud** every line; student may point, say, or circle (point = full answer)
- One idea per slide; big pictures; 2–3 picture choices
- Picture anchors: ➕ proton, ➖ electron, ⚪ neutron, 🎈 rubbed balloon
- Level 1 never needs the word "nucleus" or "correlation"

3. Add these as the IEP allows

- Read-aloud · extended time · separate setting
- Printed slides · videos paused at the "look for" part
- Cover one choice to make it 2

4. What to grade

- Progress tracker check-offs: use the notes in place of each L1.x worksheet
- **Notes**: same points as his worksheets for that lesson when complete.
- **Quiz**: score, then scale to the class points.
- These are **modifications** (less content). The IEP must allow modified grading. Check with the case manager.

5. Who to ask

- Mr. Driver (SLE): changes and IEP questions.
- Facts we could not confirm in her files say "check with Mr. Brittle".

👩‍🏫 Staff Guide · Static Electricity Stations (Level 1)

Chemistry · Unit 1A · goes with the class “L1.3 Sparks, L1.5 Particle Model of Static, L1.8 Neutral Interactions” (same points as the class worksheet). Level 1 = about 2nd-grade reading. Same activity, same day, same points as the class.

1. The pieces

- **Station card**: L1.3 Sparks stations + L1.5 / L1.8 balloon activities: balloon on hair, tinsel, paper scraps, bending a stream of water. 6 steps, one per box.
- **Prep sheet**: jobs, tools checklist, safety. Do it the day before or at the start.
- **Slides**: jobs, safety, steps, 2 checks.
- **Reflection**: replaces the written parts.
- **Game**: on the class site.

2. Prompts while they work

- “Push or pull?”
- “Show me how far away it starts to move.”
- “What did the balloon get from your hair?”

3. Modifications

- Pictures + circle the result instead of writing
- Staff can rub the balloon
- Point/say answers count fully

4. What to grade (same points as the class worksheet)

- Same points: did the stations, circled results
- Pointing, saying, or circling counts as a full answer.
- Modified grading only as the IEP allows. Check with the case manager.

5. Ask

- Mr. Driver (SLE).
