👩‍🏫 Staff Guide · Culinary 1 · Safety & Sanitation (Level 3)

Level 3 = resource-room students who can work close to the gen ed lesson. Same topics and order as Mrs. Dyches's class; more reading and writing than Level 2.

1. How the pieces line up

Class lesson	Level 3 piece
Safety & Sanitation slides and videos	Reading + guided notes A-C
Food Worker Card video / pre-test	Notes section C + quick check
Unit review	Unit game

2. Supports built in

- Reading and notes each have a web copy with a 🔊 Read aloud button (highlights as it reads)
- Key-word box at the top of the notes; word problems have a worked example first
- Less filled in than Level 2: short answers, tables, a drawing
- No slide decks: students follow Mrs. Dyches's slides with the Level 3 notes

3. Files

- Reading (+ 🔊 web copy)
- Guided notes + key (+ 🔊 web copy)
- Quick check + key
- Unit game: 10 questions

4. What to grade

- Guided notes stand in for the matching class notes or worksheet (same points when complete)
- Quick check: score it, then scale to the class quiz points
- Reading check questions: completion points
- Modified grading only as the IEP allows. Check with the case manager.

5. Who to ask

- Mr. Driver (SLE): changes and IEP questions.
- Class content: Mrs. Dyches.

🧼 Safety & Sanitation: Guided Notes

Culinary 1 · Unit 1 · Level 3 (closer to the class work) · goes with Safety & Sanitation Videos & Resources (Food Worker Card prep)

Name: _____

Use the class slides and your reading. Key words:

food-borne illness | *biological hazard* | *chemical hazard* | *physical hazard* | *cross-contamination* | *FATTOM* | *TCS food* | *Danger Zone* | *sanitize*

A. Hazards

1. Fill in the table.

Hazard	Kind (biological, chemical, physical)
Bacteria	
Bleach spray	
A hair	
A virus	

2. When germs move from one food or surface to another, it is called _____.

B. Hand washing

3. Scrub with soap for _____ seconds.

4. Dry hands with a paper _____.

5. List two times you must wash your hands.

_____

_____

C. Temperatures

6. The Danger Zone is 41°F to _____ °F.

7. FATTOM: Food, Acid, _____, Temperature, Oxygen, Moisture.

8. Fill in the table.

Food	Safe inside temperature
Chicken	
Hamburger	
Steak or fish	

9. Why should you never thaw meat on the counter?

_____

_____

🧼 Safety & Sanitation: Reading

Culinary 1 · Unit 1 · Level 3 (closer to the class work) · goes with Safety & Sanitation Videos & Resources (Food Worker Card prep)

Name: _____

Keeping Food Safe

A food-borne illness is sickness caused by eating food or drinks that carry germs or harmful things. Young children, older adults, pregnant people and people who are already ill get sick most easily.

There are three kinds of hazards. Biological hazards are germs like bacteria and viruses. Chemical hazards are things like cleaners and sanitizer. Physical hazards are objects like hair, glass or a bandage that fall into food. Cross-contamination happens when germs move from one food or surface to another, like raw chicken juice dripping onto lettuce.

Clean hands are the best way to stop germs. Wet your hands, add soap, scrub for 20 seconds (sing the ABC song), rinse and dry with a paper towel. Wash after using the restroom, after touching raw meat and before putting on gloves. Never wipe your hands on your apron.

Germs need FATTOM to grow: Food, Acid, Time, Temperature, Oxygen and Moisture. Foods like milk, meat, eggs and cooked rice are TCS foods (Time/Temperature Control for Safety). The Temperature Danger Zone is 41°F to 135°F. Keep cold food at 41°F or colder and hot food at 135°F or hotter, and check the inside with a food thermometer.

Cook poultry to 165°F, ground beef to 155°F, and steaks, pork and fish to 145°F. Thaw food in the refrigerator, under cold running water, or in the microwave if you will cook it right away, never on the counter. Clean surfaces with soap and water, then sanitize them.

Check your reading

1. Name the three kinds of hazards and give an example of each.

_____

_____

2. What is the Temperature Danger Zone?

_____

_____

3. Give one safe way to thaw food.

_____

_____

🧼 Safety & Sanitation: Quick Check

Name: _____

Multiple choice and short answer. You may have it read aloud.

1. A bandage in the salad is a…

A. Physical hazard | B. Chemical hazard | C. Biological hazard

2. Scrub your hands for at least…

A. 3 seconds | B. 5 minutes | C. 20 seconds

3. The Temperature Danger Zone is…

A. 0°F to 32°F | B. 165°F to 212°F | C. 41°F to 135°F

4. Chicken is safe at…

A. 135°F | B. 165°F | C. 100°F

5. Milk, meat, eggs and cooked rice are…

A. TCS foods | B. Dry goods | C. Physical hazards

6. Raw chicken juice drips on lettuce. What is this called, and how do you stop it?

_____

🧼 Safety & Sanitation: Guided Notes · ANSWER KEY

Culinary 1 · Unit 1 · Level 3 (closer to the class work) · goes with Safety & Sanitation Videos & Resources (Food Worker Card prep)

Name: _____

Use the class slides and your reading. Key words:

food-borne illness | *biological hazard* | *chemical hazard* | *physical hazard* | *cross-contamination* | *FATTOM* | *TCS food* | *Danger Zone* | *sanitize*

A. Hazards

1. Fill in the table.

Hazard	Kind (biological, chemical, physical)
Bacteria	**biological**
Bleach spray	**chemical**
A hair	**physical**
A virus	**biological**

2. When germs move from one food or surface to another, it is called **cross-contamination**.

B. Hand washing

3. Scrub with soap for **20** seconds.

4. Dry hands with a paper **towel**.

5. List two times you must wash your hands.
Any two: after the restroom, after touching raw meat, before putting on gloves, after touching hair/face.

C. Temperatures

6. The Danger Zone is 41°F to **135** °F.

7. FATTOM: Food, Acid, **Time**, Temperature, Oxygen, Moisture.

8. Fill in the table.

Food	Safe inside temperature
Chicken	**165°F**
Hamburger	**155°F**
Steak or fish	**145°F**

9. Why should you never thaw meat on the counter?
The outside sits in the Danger Zone and germs grow.

Keeping Food Safe

A food-borne illness is sickness caused by eating food or drinks that carry germs or harmful things. Young children, older adults, pregnant people and people who are already ill get sick most easily.

There are three kinds of hazards. Biological hazards are germs like bacteria and viruses. Chemical hazards are things like cleaners and sanitizer. Physical hazards are objects like hair, glass or a bandage that fall into food. Cross-contamination happens when germs move from one food or surface to another, like raw chicken juice dripping onto lettuce.

Clean hands are the best way to stop germs. Wet your hands, add soap, scrub for 20 seconds (sing the ABC song), rinse and dry with a paper towel. Wash after using the restroom, after touching raw meat and before putting on gloves. Never wipe your hands on your apron.

Germs need FATTOM to grow: Food, Acid, Time, Temperature, Oxygen and Moisture. Foods like milk, meat, eggs and cooked rice are TCS foods (Time/Temperature Control for Safety). The Temperature Danger Zone is 41°F to 135°F. Keep cold food at 41°F or colder and hot food at 135°F or hotter, and check the inside with a food thermometer.

Cook poultry to 165°F, ground beef to 155°F, and steaks, pork and fish to 145°F. Thaw food in the refrigerator, under cold running water, or in the microwave if you will cook it right away, never on the counter. Clean surfaces with soap and water, then sanitize them.

Check your reading

1. Name the three kinds of hazards and give an example of each.
Biological (germs), chemical (cleaner), physical (hair, glass, bandage).

2. What is the Temperature Danger Zone?
41°F to 135°F, where germs grow fastest.

3. Give one safe way to thaw food.
Refrigerator, cold running water, or microwave if cooked right away.
