👩‍🏫 Staff Guide · Culinary 1 · Measuring & Function of Ingredients (Level 3)

Level 3 = resource-room students who can work close to the gen ed lesson. Same topics and order as Mrs. Dyches's class; more reading and writing than Level 2.

1. How the pieces line up

Class lesson	Level 3 piece
Measuring & Function of Ingredients slides	Reading + notes A and B
Cookies PowerPoint / vocab sheet	Notes section C
Unit quiz	Quick check + unit game

2. Supports built in

- Reading and notes each have a web copy with a 🔊 Read aloud button (highlights as it reads)
- Key-word box at the top of the notes; word problems have a worked example first
- Less filled in than Level 2: short answers, tables, a drawing
- No slide decks: students follow Mrs. Dyches's slides with the Level 3 notes

3. Files

- Reading (+ 🔊 web copy)
- Guided notes + key (+ 🔊 web copy)
- Quick check + key
- Unit game: 10 questions

4. What to grade

- Guided notes stand in for the matching class notes or worksheet (same points when complete)
- Quick check: score it, then scale to the class quiz points
- Reading check questions: completion points
- Modified grading only as the IEP allows. Check with the case manager.

5. Who to ask

- Mr. Driver (SLE): changes and IEP questions.
- Class content: Mrs. Dyches.

🥄 Measuring & Function of Ingredients: Guided Notes

Culinary 1 · Unit 2 · Level 3 (closer to the class work) · goes with Measuring & Function of Ingredients (cookies PowerPoint and vocab sheet)

Name: _____

Use the class slides and your reading. Key words:

mise en place | *teaspoon (tsp)* | *tablespoon (Tbsp)* | *cup (c)* | *ounce (oz)* | *level off* | *creaming* | *leavening agent* | *structure*

A. Measuring

1. 3 teaspoons = 1 _____.
2. 16 tablespoons = 1 _____.
3. 1 cup = _____ fluid ounces.
4. Read a liquid measuring cup at _____ level.
5. **Measurement math**

> Example: 2 tablespoons = 2 × 3 = 6 teaspoons.

a) 1 tablespoon = ___ teaspoons _____

b) ½ cup = ___ tablespoons _____

c) 2 cups = ___ fluid ounces _____

B. Ingredient jobs

6. Fill in the table.

Ingredient	Job
Flour	
Fat	
Sugar	
Eggs	
Baking soda / powder	
Salt	

C. Creaming method

7. Creaming means beating fat and _____ until light and fluffy.
8. Why do we use parchment paper on a cookie sheet?

_____

🥄 Measuring & Function of Ingredients: Reading

Culinary 1 · Unit 2 · Level 3 (closer to the class work) · goes with Measuring & Function of Ingredients (cookies PowerPoint and vocab sheet)

Name: _____

Measure It Right

Baking is like science: the amounts matter. Before you start, do mise en place, which means “everything in its place.” Read the recipe and set out all of your tools and ingredients.

Know your measurements: 3 teaspoons = 1 tablespoon, 16 tablespoons = 1 cup, and 1 cup = 8 fluid ounces. Recipes use short forms: tsp is teaspoon, Tbsp is tablespoon, c is cup and oz is ounce.

Measure liquids like milk and water in a clear liquid measuring cup on the counter and read it at eye level. Measure flour in a dry measuring cup: fluff the flour, spoon or scoop it in, then level it off with a straight edge. Brown sugar is packed firmly into the cup.

Each ingredient has a job. Flour gives structure and holds the food together. Fat (butter or shortening) makes it tender and adds flavor. Sugar makes it sweet and helps it brown. Eggs add moisture and structure. Baking soda and baking powder are leavening agents that make gas so the food rises. Salt adds flavor.

In the creaming method you beat fat and sugar with a mixer until light and fluffy, which adds air to cookies and cakes. Parchment paper on the pan keeps cookies from sticking.

Check your reading

1. What does mise en place mean, and why do it?

2. How do you measure flour?

3. What is the job of baking powder?

🥄 Measuring & Function of Ingredients: Quick Check

Culinary 1 · Unit 2 · Level 3 (closer to the class work) · goes with Measuring & Function of Ingredients (cookies PowerPoint and vocab sheet)

Name: _____

Multiple choice and short answer. You may have it read aloud.

1. 3 teaspoons equal…

A. 1 tablespoon | B. 1 cup | C. 1 ounce

2. “Tbsp” means…

A. Teaspoon | B. Tiny spoon | C. Tablespoon

3. Which ingredient gives structure?

A. Salt | B. Sugar | C. Flour

4. Leavening agents make food…

A. Salty | B. Rise | C. Cold

5. Read a liquid measuring cup…

A. At eye level | B. From above | C. Upside down

6. Explain how to measure 1 cup of flour.

_____

_____

🥄 Measuring & Function of Ingredients: Guided Notes · ANSWER KEY

Culinary 1 · Unit 2 · Level 3 (closer to the class work) · goes with Measuring & Function of Ingredients (cookies PowerPoint and vocab sheet)

Name: _____

Use the class slides and your reading. Key words:

mise en place | *teaspoon (tsp)* | *tablespoon (Tbsp)* | *cup (c)* | *ounce (oz)* | *level off* | *creaming* | *leavening agent* | *structure*

A. Measuring

1. 3 teaspoons = 1 **tablespoon** .
2. 16 tablespoons = 1 **cup** .
3. 1 cup = **8** fluid ounces.
4. Read a liquid measuring cup at **eye** level.
5. **Measurement math**

> Example: 2 tablespoons = 2 × 3 = 6 teaspoons.

a) 1 tablespoon = ___ teaspoons **3**

b) ½ cup = ___ tablespoons **8**

c) 2 cups = ___ fluid ounces **16**

B. Ingredient jobs

6. Fill in the table.

Ingredient	Job
Flour	**structure**
Fat	**tender + flavor**
Sugar	**sweet + browning**
Eggs	**moisture + structure**
Baking soda / powder	**makes it rise**
Salt	**flavor**

C. Creaming method

7. Creaming means beating fat and **sugar** until light and fluffy.

8. Why do we use parchment paper on a cookie sheet?
So cookies don't stick (easy clean-up).

Measure It Right

Baking is like science: the amounts matter. Before you start, do mise en place, which means “everything in its place.” Read the recipe and set out all of your tools and ingredients.

Know your measurements: 3 teaspoons = 1 tablespoon, 16 tablespoons = 1 cup, and 1 cup = 8 fluid ounces. Recipes use short forms: tsp is teaspoon, Tbsp is tablespoon, c is cup and oz is ounce.

Measure liquids like milk and water in a clear liquid measuring cup on the counter and read it at eye level. Measure flour in a dry measuring cup: fluff the flour, spoon or scoop it in, then level it off with a straight edge. Brown sugar is packed firmly into the cup.

Each ingredient has a job. Flour gives structure and holds the food together. Fat (butter or shortening) makes it tender and adds flavor. Sugar makes it sweet and helps it brown. Eggs add moisture and structure. Baking soda and baking powder are leavening agents that make gas so the food rises. Salt adds flavor.

In the creaming method you beat fat and sugar with a mixer until light and fluffy, which adds air to cookies and cakes. Parchment paper on the pan keeps cookies from sticking.

Check your reading

1. What does mise en place mean, and why do it?
Everything in its place; you have everything ready so you don't miss a step.
2. How do you measure flour?
Fluff, scoop or spoon in, level off.
3. What is the job of baking powder?
Leavening: makes gas so food rises.
