👩‍🏫 Staff Guide · Culinary 1 · Quick Breads (Level 3)

Level 3 = resource-room students who can work close to the gen ed lesson. Same topics and order as Mrs. Dyches's class; more reading and writing than Level 2.

1. How the pieces line up

Class lesson	Level 3 piece
Quick Breads slides / note sheet	Reading + notes A-C
Quick Breads quiz	Quick check
Unit review	Unit game

2. Supports built in

- Reading and notes each have a web copy with a 🔊 Read aloud button (highlights as it reads)
- Key-word box at the top of the notes; word problems have a worked example first
- Less filled in than Level 2: short answers, tables, a drawing
- No slide decks: students follow Mrs. Dyches's slides with the Level 3 notes

3. Files

- Reading (+ 🔊 web copy)
- Guided notes + key (+ 🔊 web copy)
- Quick check + key
- Unit game: 10 questions

4. What to grade

- Guided notes stand in for the matching class notes or worksheet (same points when complete)
- Quick check: score it, then scale to the class quiz points
- Reading check questions: completion points
- Modified grading only as the IEP allows. Check with the case manager.

5. Who to ask

- Mr. Driver (SLE): changes and IEP questions.
- Class content: Mrs. Dyches.

Name: _____

Quick Breads

A quick bread rises fast with baking soda or baking powder instead of yeast. Muffins, biscuits, scones, pancakes, waffles and banana bread are quick breads. Yeast breads, like pizza dough and dinner rolls, need time to rise.

Baking soda needs an acid, like buttermilk or lemon juice, to make bubbles. Baking powder already has an acid inside. Most baking powder is double acting: it makes bubbles once when it gets wet and again when it gets hot in the oven.

A batter is wet; you can pour it or drop it from a spoon. A dough is thick; you can touch it and shape it. Gluten is the protein in flour. Too much mixing builds gluten and makes quick breads tough, with tunnels inside.

The muffin method: 1) mix the dry ingredients, 2) mix the wet ingredients, 3) add the wet to the dry, 4) stir just until moist. The batter should still be lumpy.

The biscuit method: mix the dry ingredients, then cut in cold fat until it looks like peas, add the liquid, and knead lightly a few times. Cold fat melts in the oven and makes flaky layers.

Name: _____

Quick Breads

A quick bread rises fast with baking soda or baking powder instead of yeast. Muffins, biscuits, scones, pancakes, waffles and banana bread are quick breads. Yeast breads, like pizza dough and dinner rolls, need time to rise.

Baking soda needs an acid, like buttermilk or lemon juice, to make bubbles. Baking powder already has an acid inside. Most baking powder is double acting: it makes bubbles once when it gets wet and again when it gets hot in the oven.

A batter is wet; you can pour it or drop it from a spoon. A dough is thick; you can touch it and shape it. Gluten is the protein in flour. Too much mixing builds gluten and makes quick breads tough, with tunnels inside.

The muffin method: 1) mix the dry ingredients, 2) mix the wet ingredients, 3) add the wet to the dry, 4) stir just until moist. The batter should still be lumpy.

The biscuit method: mix the dry ingredients, then cut in cold fat until it looks like peas, add the liquid, and knead lightly a few times. Cold fat melts in the oven and makes flaky layers.

Check your reading

1. How is a quick bread different from a yeast bread?
Quick breads rise with baking soda/powder and are fast; yeast breads use yeast and need time to rise.

2. Why should muffin batter stay lumpy?
Overmixing builds gluten and makes muffins tough with tunnels.

3. What does “cut in” mean?
Mix solid fat into flour until it looks like peas.
