Roux, Mirepoix and Sauces

A roux is equal parts fat and flour cooked together. It is used to make soups and sauces thick. To make one, melt butter on low, whisk in the flour, cook until smooth and bubbly, then slowly whisk in the liquid.

The longer a roux cooks, the darker and nuttier it gets. A white roux cooks 3 to 5 minutes, a blond roux 5 to 6 minutes, and a brown roux 15 to 20 minutes. A darker roux has more flavor but thickens less. Another thickener is a slurry: cornstarch mixed with cold water.

Mirepoix is a mix of chopped onion, celery and carrot (usually 2 parts onion to 1 part celery and 1 part carrot). It is cooked slowly in fat to build the flavor base for soups, stocks and sauces.

There are five mother sauces. Béchamel is milk with a white roux. Velouté is white stock with a blond roux. Espagnole is brown stock with a brown roux. Tomato sauce is made from tomatoes. Hollandaise is butter and egg yolk.

Milk can scorch, or burn on the bottom of the pan, so cook cream soups on medium-low heat and stir often.
