👩‍🏫 Staff Guide · Culinary 1 · Milk, Dairy & Eggs (Level 3)

Level 3 = resource-room students who can work close to the gen ed lesson. Same topics and order as Mrs. Dyches's class; more reading and writing than Level 2.

1. How the pieces line up

Class lesson	Level 3 piece
Milk, Dairy & Eggs PowerPoints	Reading + notes A-C
Eggs 7 Ways / German pancake labs	Notes section B
Quiz on Eggs, Milk & Cheese	Quick check + unit game

2. Supports built in

- Reading and notes each have a web copy with a 🔊 Read aloud button (highlights as it reads)
- Key-word box at the top of the notes; word problems have a worked example first
- Less filled in than Level 2: short answers, tables, a drawing
- No slide decks: students follow Mrs. Dyches's slides with the Level 3 notes

3. Files

- Reading (+ 🔊 web copy)
- Guided notes + key (+ 🔊 web copy)
- Quick check + key
- Unit game: 10 questions

4. What to grade

- Guided notes stand in for the matching class notes or worksheet (same points when complete)
- Quick check: score it, then scale to the class quiz points
- Reading check questions: completion points
- Modified grading only as the IEP allows. Check with the case manager.

5. Who to ask

- Mr. Driver (SLE): changes and IEP questions.
- Class content: Mrs. Dyches.

🥚 Milk, Dairy & Eggs: Guided Notes

Culinary 1 · Unit 9 · Level 3 (closer to the class work) · goes with Milk, Dairy & Eggs Unit + Protein & Eggs (PowerPoints)

Name: _____

Use the class slides and your reading. Key words:

protein *amino acids* *complete protein* *yolk* *albumen* *chalazae* *air cell* *bind* *leaven* *poached* *pasteurized* *homogenized* *curds* *whey*

A. Protein

1. Protein builds and _____ your body.
2. _____ are the building blocks of protein.

B. Eggs

3. Fill in the table.

Egg part	What it is
Yolk	
Albumen	
Chalazae	
Air cell	

4. A fresh egg _____ in cold water.
5. Store eggs with the _____ end down.
6. Fill in the table.

Egg job	Food example
Bind	
Thicken	
Leaven	

C. Milk and cheese

7. _____ milk is heated to kill germs.
8. Cheese is made from solid _____.
9. Why don't we see cream on top of store milk?

_____

🥚 Milk, Dairy & Eggs: Reading

Culinary 1 · Unit 9 · Level 3 (closer to the class work) · goes with Milk, Dairy & Eggs Unit + Protein & Eggs (PowerPoints)

Name: _____

Protein, Milk, Eggs and Cheese

Protein builds and repairs your body. Amino acids are the building blocks of protein. A complete protein has all the amino acids your body needs; it comes from animal foods like eggs, milk, meat and fish.

An egg has parts. The yolk is the yellow part. The albumen is the egg white. The chalazae are cords that hold the yolk in the middle. The air cell is a pocket of air at the big end. Shell color comes from the breed of the chicken, not the nutrition.

Store eggs in the refrigerator with the pointy end down. A fresh egg sinks in cold water; an old egg floats because its air cell is bigger. Cook eggs until the white and yolk are firm, or to 160°F in dishes like scrambles.

Eggs have jobs in recipes. They bind (hold food together, like in meat loaf), thicken (like in pudding) and leaven (help food rise, like German pancakes). A poached egg is cooked in simmering water. Eggs can be cooked many ways: scrambled, fried, poached, hard-cooked, an omelet and more.

Pasteurized milk has been heated to kill germs. Homogenized milk has its fat broken into tiny pieces so the cream does not rise to the top. Cheese is made when milk separates into solid curds and liquid whey.

Check your reading

1. What are three jobs eggs do in recipes?

2. How can you tell if an egg is fresh?

3. What is the difference between pasteurized and homogenized?

🥚 Milk, Dairy & Eggs: Quick Check

Culinary 1 · Unit 9 · Level 3 (closer to the class work) · goes with Milk, Dairy & Eggs Unit + Protein & Eggs (PowerPoints)

Name: _____

Multiple choice and short answer. You may have it read aloud.

1. The egg white is the…

A. Albumen | B. Yolk | C. Chalazae

2. Shell color depends on the…

A. Freshness | B. Protein | C. Breed of chicken

3. An old egg in cold water…

A. Sinks | B. Cracks | C. Floats

4. In German pancakes, eggs help the food…

A. Stay flat | B. Rise (leaven) | C. Turn green

5. A complete protein comes from…

A. Animal foods like eggs | B. Sugar | C. Water

6. Explain how cheese is made in one sentence.

_____

🥚 Milk, Dairy & Eggs: Guided Notes · ANSWER KEY

Culinary 1 · Unit 9 · Level 3 (closer to the class work) · goes with Milk, Dairy & Eggs Unit + Protein & Eggs (PowerPoints)

Name: _____

Use the class slides and your reading. Key words:

protein · *amino acids* · *complete protein* · *yolk* · *albumen* · *chalazae* · *air cell* · *bind* · *leaven* · *poached* · *pasteurized* · *homogenized* · *curds* · *whey*

A. Protein

1. Protein builds and **repairs** your body.
2. **Amino acids** are the building blocks of protein.

B. Eggs

3. Fill in the table.

Egg part	What it is
Yolk	**the yellow part**
Albumen	**the egg white**
Chalazae	**cords that hold the yolk**
Air cell	**air at the big end**

4. A fresh egg **sinks** in cold water.
5. Store eggs with the **pointy** end down.
6. Fill in the table.

Egg job	Food example
Bind	**meat loaf**
Thicken	**pudding**
Leaven	**German pancakes**

C. Milk and cheese

7. **Pasteurized** milk is heated to kill germs.
8. Cheese is made from solid **curds**.
9. Why don't we see cream on top of store milk?
It is homogenized: fat is broken into tiny pieces.
