👩‍🏫 Staff Guide · Horticulture 1 · Unit 4 Plant ID (Level 3)

Level 3 = resource-room students who can work close to the gen ed lesson. No slide decks: students follow the class teacher's lesson and slides with Level 3 readings, guided notes and a quick check.

1. How the pieces line up

Gen ed lesson	Level 3 piece
Her readings and worksheets	Level 3 reading (5 short paragraphs) + check questions
Class notes	Level 3 guided notes + key
Unit quiz / test	Level 3 quick check + key
Review (Kahoot / Jeopardy)	1 Level 3 game on the class site: 10 questions + a matching round

2. Supports built in

- 🔊 Read aloud on the reading and notes pages (tap the button)
- Key terms listed at the top of the notes
- Short-answer lines sized for 1-2 sentences

3. What to grade

- Notes and reading checks: same points as her worksheets for that lesson
- Quick check: score, then scale to her test points
- Modified grading only as the IEP allows. Check with the case manager.

4. Who to ask

- Mr. Driver (SLE): changes and IEP questions.
- Facts we could not confirm say “check with the class teacher”.

🚧 Under construction (check with the class teacher)

- **Plant ID paper quizzes**: Photo ID quizzes are done live with real plants and are not in the export.
- **Plant photos**: The class Plant ID deck photos are not ours to post; we use emoji cards. Add our own greenhouse photos later.

⚠️ Safety: tools and plants

- **Tools**: students may use all tools (pruners, knives, floral wire, low-temp glue guns) **with an adult right there**. Staff hand tools out, stay at the station, and count them back in. Cut-resistant gloves if possible.
- **Poinsettia sap** is milky and can irritate skin and eyes. Gloves on, no rubbing eyes, wash hands after.
- **Latex**: poinsettias are in the latex family. Students with a latex allergy wear non-latex (nitrile) gloves or skip handling; check health plans.
- **Bees and pollen**: check IEP/health plans for bee-sting or pollen allergies and know where the EpiPen is before greenhouse work.
- **Mouths**: no plants, soil, seeds, berries, fertilizer or rooting hormone in mouths. Students who mouth objects or have pica need one-to-one eyes in the greenhouse. Many plants (holly and mistletoe berries, some houseplants) are poisonous.
- **Chemicals**: rooting hormone and fertilizer with gloves, then wash hands. Pesticides and growth regulators are staff/teacher only; students never spray or handle them.
- **Greenhouse**: wet floors and hoses (slips), heat (water breaks), wet dry potting mix first (dust).

🔎 Plant ID: Guided Notes

Horticulture 1 · Unit 4 · Level 3 (closer to the class work) · goes with Plant ID template, 16 bedding plants, Plant ID quizzes and final

Name: _____

Use the class slides and your reading. Key words:

bedding plant | *growth habit* | *upright* | *mounding* | *trailing* | *composite* | *tube flower* | *Tagetes* | *Antirrhinum* | *Pelargonium* | *selling point*

A. ID steps

1. List the three main clues you use to identify a plant.

_____

_____

B. Bedding plants

2. Fill in the table.

Common name	Scientific name	Flower type	Habit
Marigold			
Snapdragon			
Sweet alyssum			
Fuchsia			

C. Template

3. The template has _____ fields.

4. Write one selling point for a Wave petunia.

_____

🔎 Plant ID: Reading

Horticulture 1 · Unit 4 · Level 3 (closer to the class work) · goes with Plant ID template, 16 bedding plants, Plant ID quizzes and final

Name: _____

Identifying Bedding Plants

Bedding plants are young flowering plants grown in greenhouses and sold in spring for gardens, pots and hanging baskets. Being able to identify them is one of the most important skills for a greenhouse or garden center worker, because customers ask what a plant is and how to care for it.

To identify a plant, start with its flower type: simple, tube or composite. Marigolds (Tagetes), gerbera daisies and African daisies (Osteospermum) have composite flowers. Snapdragons (Antirrhinum), fuchsias and lobelia have tube flowers. Petunias, geraniums (Pelargonium), stock (Matthiola) and begonias have simple flowers.

Next, look at the leaves and the growth habit. Upright plants such as snapdragons and stock grow tall. Mounding plants such as sweet alyssum (Lobularia maritima) and begonias form a dome. Trailing plants such as Wave petunias, calibrachoa, bacopa, lobelia and lysimachia spill over the edge of pots. Sweet potato vine (Ipomoea batatas) is grown for its colorful leaves rather than its flowers.

The class Plant ID template has 15 fields: common and scientific name, life cycle, growth habit, height, leaf form, margin and arrangement, flower type, water and light needs, uses, selling points, colors and two photos. Selling points, such as 'blooms all summer' or 'great for baskets,' help customers choose at the plant sale.

Check your reading

1. Name two plants with composite flowers and two with tube flowers.

2. Which plants would you choose for a hanging basket and why?

3. Why are selling points included on a Plant ID card?

🏷️ Plant ID Card: Lab Sheet

Horticulture 1 · Unit 4 · Level 3 · goes with Plant ID template (15 fields)

Name: _____

Question: Can you complete a 15-field Plant ID card for one bedding plant?

Materials

Plant ID template, bedding plant, ruler, camera

⚠️ Safety

- Hands away from face
- Wash hands after handling plants

Prediction

What growth habit do you think your plant has?

_____

_____

Procedure

1. Copy names from the tag.
2. Observe flower, leaves and habit.
3. Measure height.
4. Record light/water from the tag.
5. Write use and selling point.
6. Take 2 photos.

Data

Field	Your plant
Common name	
Scientific name	
Life cycle	
Growth habit	
Flower type	
Selling point	

Analysis (Claim, Evidence, Reasoning)

1. Claim: where should a customer plant this? Use evidence from your card (light, habit, height).

🔎 Plant ID: Quick Check

Horticulture 1 · Unit 4 · Level 3 (closer to the class work) · goes with Plant ID template, 16 bedding plants, Plant ID quizzes and final

Name: _____

Multiple choice and short answer. You may have it read aloud.

1. Antirrhinum is the scientific name of…

A. Marigold | B. Begonia | C. Snapdragon

2. Which plant is grown mainly for foliage?

A. Sweet potato vine | B. Gerbera | C. Stock

3. Which has a trailing habit?

A. Snapdragon | B. Stock | C. Bacopa

4. Which has composite flowers?

A. African daisy | B. Fuchsia | C. Lobelia

5. Choose one bedding plant and fill in 4 template fields for it.

6. Why do growers learn scientific names for bedding plants?

🔎 Plant ID: Guided Notes · ANSWER KEY

Horticulture 1 · Unit 4 · Level 3 (closer to the class work) · goes with Plant ID template, 16 bedding plants, Plant ID quizzes and final

Name: _____

Use the class slides and your reading. Key words:

bedding plant · *growth habit* · *upright* · *mounding* · *trailing* · *composite* · *tube flower* · *Tagetes* · *Antirrhinum* · *Pelargonium* · *selling point*

A. ID steps

1. List the three main clues you use to identify a plant.
Flower type, leaf traits (form, margin, arrangement), growth habit.

B. Bedding plants

2. Fill in the table.

Common name	Scientific name	Flower type	Habit
Marigold	**Tagetes**	**composite**	**upright**
Snapdragon	**Antirrhinum**	**tube**	**upright**
Sweet alyssum	**Lobularia maritima**	**simple**	**mounding**
Fuchsia	**Fuchsia**	**tube**	**cascading**

C. Template

3. The template has **15** fields.

4. Write one selling point for a Wave petunia.
Spreads to fill baskets and beds; blooms all summer.

🔑 *Key written by our team from the class teacher's worksheets and slides, please check.*

🏷️ Plant ID Card: Lab Sheet · ANSWER KEY

Horticulture 1 · Unit 4 · Level 3 · goes with Plant ID template (15 fields)

Name: _____

Question: Can you complete a 15-field Plant ID card for one bedding plant?

Materials

Plant ID template, bedding plant, ruler, camera

⚠️ Safety

- Hands away from face
- Wash hands after handling plants

Prediction

What growth habit do you think your plant has?
Depends on plant.

Procedure

1. Copy names from the tag.
2. Observe flower, leaves and habit.
3. Measure height.
4. Record light/water from the tag.
5. Write use and selling point.
6. Take 2 photos.

Data

Field	Your plant
Common name	**Marigold (example)**
Scientific name	**Tagetes**
Life cycle	**annual**
Growth habit	**upright**
Flower type	**composite**
Selling point	**bright color all summer**

Expected results (your class data may differ).

Analysis (Claim, Evidence, Reasoning)

1. Claim: where should a customer plant this? Use evidence from your card (light, habit, height).
Answers vary by plant.

🔑 *Key written by our team from the class teacher's lab sheets, please check.*

🔎 Plant ID: Quick Check · ANSWER KEY

Horticulture 1 · Unit 4 · Level 3 (closer to the class work) · goes with Plant ID template, 16 bedding plants, Plant ID quizzes and final

Name: _____

Multiple choice and short answer. You may have it read aloud.

1. Antirrhinum is the scientific name of…

A. Marigold | B. Begonia | **C. Snapdragon**

2. Which plant is grown mainly for foliage?

A. Sweet potato vine | B. Gerbera | C. Stock

3. Which has a trailing habit?

A. Snapdragon | B. Stock | **C. Bacopa**

4. Which has composite flowers?

A. African daisy | B. Fuchsia | C. Lobelia

5. Choose one bedding plant and fill in 4 template fields for it.

E.g., marigold: Tagetes, annual, upright, composite, full sun.

6. Why do growers learn scientific names for bedding plants?

Common names vary; scientific names identify the exact plant for ordering and care.

🔑 *Written by our team from her Plant ID template and plant list, please check.*
