📖 Substance Use & Abuse: Vocabulary Picture Cards (Level 2)

Name: _____

Cut on the dashed lines. Use the cards to match, sort, or quiz a partner.

Substance

Anything that changes your mood or mind, like alcohol, nicotine, cannabis or opioids.

Brain development

The brain keeps developing until about age 25. The part for decisions (prefrontal cortex) finishes last.

Progression

Use can move from trying it, to mild, moderate and severe use.

Stages of change

Pre-contemplation, contemplation, preparation, action, maintenance.

Protective factor

Things that lower the chance of harm, like caring adults, activities and goals.

Risk factor

Things that raise the chance of harm, like stress, peer pressure or easy access.

Fentanyl

A very strong opioid. A tiny amount can cause an overdose. It is hidden in fake pills.

Naloxone

A nasal spray (Narcan) that can reverse an opioid overdose. Call 911 too.
