Quick Review

🫶 Last unit: consent is clear, free and ongoing.

🩺 Today: how to protect health and where to get care.

❓ Where could a teen get honest health information?

Words to Know

Words to Know

Abstinence

Choosing not to have sex. The only method that is 100% effective against pregnancy and STIs.

Contraception

Methods that prevent pregnancy, like the pill, the implant, the IUD and condoms.

Typical use

How well a method works with real-life mistakes. Perfect use is always used correctly.

Condom

A thin barrier that lowers the risk of both pregnancy and STIs.

Words to Know

More Words to Know

🦠 **STI**: Sexually transmitted infection: an infection passed through sexual contact.

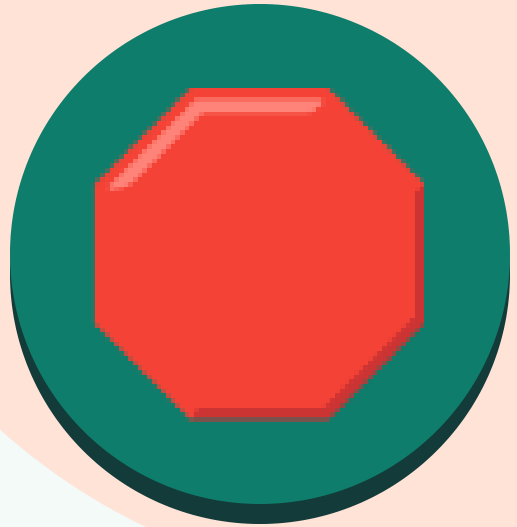

💉 **Curable**: Can be cured with medicine (chlamydia, gonorrhea, syphilis, trichomoniasis).

🧬 **HIV**: A virus that attacks the immune system. Treatable, not curable.

🧪 **Testing**: The only way to know if you have an STI. In WA, teens 14+ can get STI care confidentially.

Learn

Abstinence

🛑 Abstinence = choosing **not to have sex**.

💯 The **only 100%** effective way to prevent pregnancy and STIs.

🔄 Anyone can choose it, any time.

Compare

Perfect vs. Typical Use

✅

Perfect use

Used correctly every time
Best-case number
Pill: over 99%

🎯

Typical use

Real life, with mistakes
Lower number
Pill: about 93%

Learn

Contraception Methods

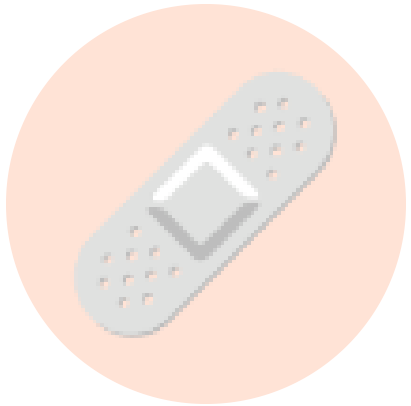

🌱 **Implant** and **IUD**: over 99%, last for years.

💊 **Pill**, shot, patch, ring: need to be used on time.

🩹 **Condoms**: about 87% typical use.

⚠️ Only **condoms** (and abstinence) protect against **STIs**.

🃏 Check 1 of 3

Which method protects against both pregnancy AND STIs?

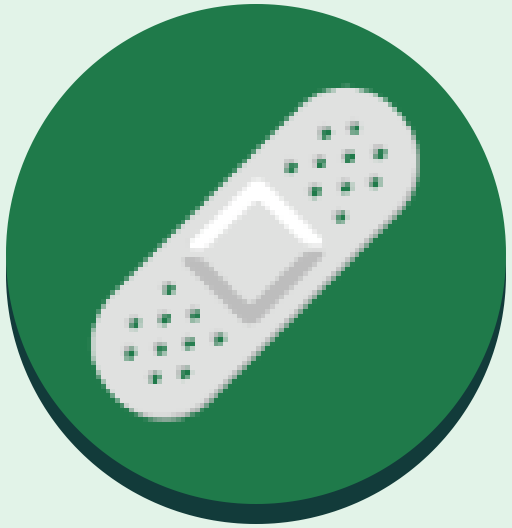

Hold up 1, 2, or 3:

1️⃣ The pill

2️⃣ Condoms

3️⃣ The implant

✅ Answer · Card 1 of 3

Condoms

Only condoms (and abstinence).

Learn

Condom Steps

1️⃣ Check the **expiration date**.

2️⃣ Open the package carefully (no teeth or scissors).

3️⃣ Use a **new** condom every time.

4️⃣ Throw it in the trash after.

Compare

STIs

💊 Curable (bacteria/parasite)

Chlamydia
Gonorrhea
Syphilis
Trichomoniasis

🧬 Treatable not curable (virus)

HIV
HPV
Herpes
Hepatitis B

🃏 Check 2 of 3

Which STI can be cured with medicine?

Hold up 1, 2, or 3:

1️⃣ HIV

2️⃣ Herpes

3️⃣ Chlamydia

✅ Answer · Card 2 of 3

Chlamydia

Bacterial STIs are curable.

Learn

How STIs Spread

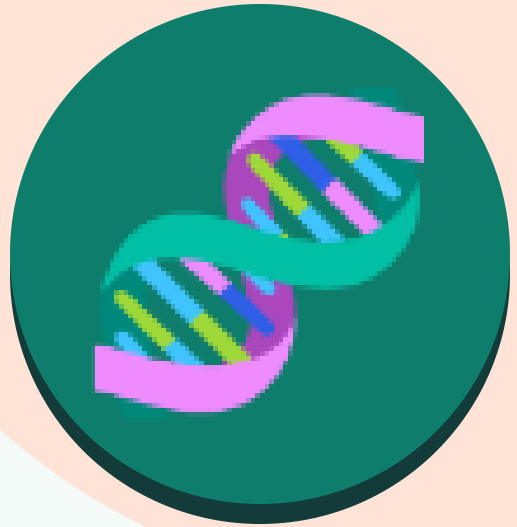

💧 Through body fluids (blood, semen, vaginal fluid) or skin contact.

🙈 Many STIs have **no symptoms**.

📊 Young people 15–24 get about **half** of new STIs.

Learn

HIV and HPV

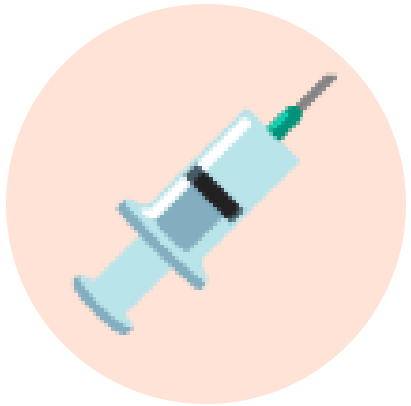

🧬 **HIV** attacks the immune system. Medicine keeps people healthy for life.

💉 The **HPV vaccine** prevents cancers caused by HPV.

💉 A **hepatitis B** vaccine also exists.

🃏 Check 3 of 3

The HPV vaccine helps prevent...

Hold up 1, 2, or 3:

1️⃣ Some cancers

2️⃣ The flu

3️⃣ Broken bones

✅ Answer · Card 3 of 3

Some cancers

HPV can cause cancer.

Learn

Testing and Confidential Care

🧪 **Testing** is the only way to know.

🔒 In WA, teens **14+** can get STI testing and treatment **confidentially**.

🔎 Find testing: **gettested.cdc.gov**.

Learn

Making a Plan

🎯 Know your **limits** before you're in the moment.

🗣️ Talk with a partner and trusted adults.

✋ You can always say **no**, any time.
