🥽 Lab Safety & Equipment: Quick Check · ANSWER KEY

Chemistry · Unit 0 · Level 3 (closer to the class work) · goes with Safety Contract, L0.1 Lab Equipment Activity, L0.2 demos, L0.3 Equipment Practice

Name: _____

Multiple choice and short answer. You may have it read aloud.

1. When must you wear goggles?

A. Only when using fire	B. Only during tests	**C. Any time chemicals, heat or glassware are used**

2. A chemical splashes on your skin. What do you do first?

A. Rinse with running water for 20 minutes	B. Wipe it with your shirt	C. Wait to see if it hurts

3. A label shows the corrosive symbol. The chemical can…

A. Glow in the dark	B. Only catch fire	**C. Destroy skin or metal**

4. Where do you read the volume in a graduated cylinder?

A. The bottom of the meniscus	B. The top edge of the curve	C. The side of the cylinder

5. Why do you press tare on a balance with a paper boat on it?

A. To change grams to pounds	**B. So only the sample's mass is shown**	C. To turn off the balance

6. Start: 40 mL of water. After a rock is added: 47 mL. What is the rock's volume? Show your work.
47 − 40 = 7 mL.

7. Your lab partner drops a beaker and it breaks. List 2 things you should do.
Tell the teacher right away; do not touch the glass; use a brush and dustpan; put it in the glass disposal box.
