🥽 Lab Safety & Equipment: Quick Check

Chemistry · Unit 0 · Level 3 (closer to the class work) · goes with Safety Contract, L0.1 Lab Equipment Activity, L0.2 demos, L0.3 Equipment Practice

Name: _____

Multiple choice and short answer. You may have it read aloud.

1. When must you wear goggles?

- A. Only when using fire
- B. Only during tests
- C. Any time chemicals, heat or glassware are used

2. A chemical splashes on your skin. What do you do first?

- A. Rinse with running water for 20 minutes
- B. Wipe it with your shirt
- C. Wait to see if it hurts

3. A label shows the corrosive symbol. The chemical can…

- A. Glow in the dark
- B. Only catch fire
- C. Destroy skin or metal

4. Where do you read the volume in a graduated cylinder?

- A. The bottom of the meniscus
- B. The top edge of the curve
- C. The side of the cylinder

5. Why do you press tare on a balance with a paper boat on it?

- A. To change grams to pounds
- B. So only the sample's mass is shown
- C. To turn off the balance

6. Start: 40 mL of water. After a rock is added: 47 mL. What is the rock's volume? Show your work.

7. Your lab partner drops a beaker and it breaks. List 2 things you should do.
