# Static Electricity Stations

## TODAY'S PLAN

- 👥 Jobs
- ⚠️ Safety
- 🌱 Steps
- ✅ Check
- 📝 Reflect

Get ready

# Jobs

## Rubber

Rubs the balloon on hair or a sweater for 10 seconds.

## Watcher

Watches closely and says what moves.

## Recorder

Writes or circles what happened at each station.

## Timer

Counts 10 seconds of rubbing and moves the group on.

Safety

# Be Safe

🎈 Do not pop balloons near faces. Tell staff about latex allergies.

💧 Wipe up water spills right away.

🔌 Stay away from outlets and computers with the charged balloon.

Steps

# Steps

1. 🎈 **Charge** the balloon: rub it on hair or wool for 10 seconds.
2. 📄 **Station 1**: hold it 2 cm above paper scraps. Record what happens.
3. ✨ **Station 2**: hold it near tinsel. Record attract or repel.
4. 🚰 **Station 3**: hold it near a thin stream of water. Record what happens.
5. 🎈🎈 **Station 4**: charge 2 balloons, hang them close. Record attract or repel.
6. 📝 **Explain**: which charges were the same? Which were opposite?

🃏 Check 1 of 2

# Why does neutral paper jump to the balloon?

**Hold up 1, 2, or 3:**

1️⃣ Its electrons shift; the near side is +

2️⃣ The paper is negative

3️⃣ Air pushes it

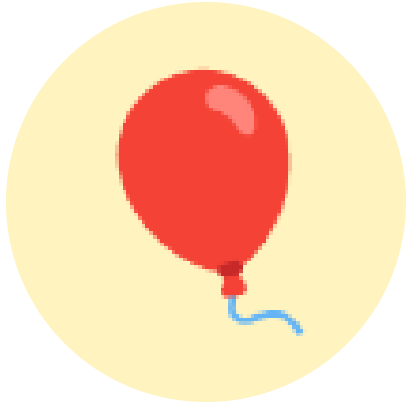

✅ Answer · Card 1 of 2

# Its electrons shift; the near side is +

Polarized paper is pulled.

🃏 Check 2 of 2

# Two charged balloons repel because...

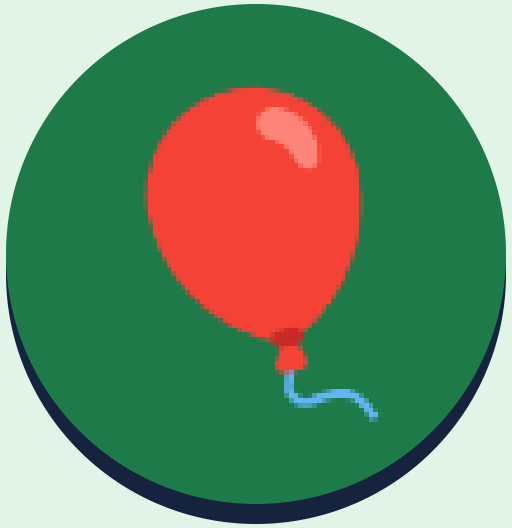

**Hold up 1, 2, or 3:**

1️⃣ One is positive

2️⃣ They are neutral

3️⃣ Both are negative

✅ Answer · Card 2 of 2

# Both are negative

Like charges repel.

Wrap-Up

# Clean Up + Reflect

- 🎈 **Balloons back**
- 🧽 **Wipe water**
- 📝 **Finish the table and reflection**
