⚡ Lightning lessons 1-6 notes · ANSWER KEY

Chemistry · Unit 1A Charges & Static · Level 2 guided notes. Use with the class slides.

Name: _____

Fill in each blank with a word from the word bank in that box. Each word is used one time.

A. Lightning and models (L1.1, L1.2)

1. Lightning is a giant electric **spark** .
2. Lightning makes the sound we call **thunder** .
3. Rain and lightning happen together. This is a **correlation** , not proof of cause.

Word bank: **correlation** **spark** **thunder**

B. Atoms (L1.5)

4. Protons have a **positive** charge.
5. Electrons have a **negative** charge.
6. An atom with equal + and − is **neutral** .
7. Match the particle to where it is:

(Key: proton → nucleus, does not move · electron → outside, can move · neutron → nucleus, no charge)

proton	nucleus, no charge
electron	outside, can move
neutron	nucleus, does not move

Word bank: **negative** **neutral** **positive**

C. Static and sparks (L1.3, L1.6)

8. Rubbing moves **electrons** from one object to another.
9. Extra electrons make an object **negative** .
10. Number the steps (1-4):

2 Electrons move to the balloon

4 Charge jumps: a spark

1 Rub the balloon on hair

3 Charge builds up

Word bank: **electrons** **negative**
