👩‍🏫 Staff Guide · Chemistry · Unit 1A Charges & Static (Level 2)

Level 2 = about 3rd-grade reading. SLE students stay in Mr. Brittle's lesson and use these pieces next to it: same topics, same order, same points.

1. How the pieces line up

Gen ed piece (Canvas: "Unit 1 Lightning: L1.1 Initial Model of Lightning, L1.2 Smaller Scales, L1.3 Sparks, L1.5 Particle Model of Static, L1.6 Cause of Static")	**Level 2 piece**
L1.1 Initial Model of Lightning + slides	Slides "Lightning" + notes part A
L1.2 Smaller Scales (rain/lightning graph, correlation vs causation)	Notes part A; Level 1 skips the graph
L1.3 Sparks (water dropper stations)	Static Electricity Stations lab packet + slides "Sparks"
L1.5 Particle Model of Static + L1.6 Cause of Static (reading)	Slides "Atoms", "Rubbing moves electrons" + notes parts B-C
Class slides	Deck: 19 slides, Words to Know first, hold-up-1-2-3 checks, recap
His worksheets (grouped into lessons)	Guided notes: 15 items + key
Class quiz / notes check	Quiz: 10 questions + key
Vocabulary	8 picture cards (cut apart)
—	1 game on the class site: 10 questions + a matching round

2. Supports built in

- Short lines, key words bold, word bank in every notes box
- Quiz: 3 choices, no "all of the above"
- Picture anchors: ➕ proton, ➖ electron, ⚪ neutron, 🎈 rubbed balloon
- Level 1 never needs the word "nucleus" or "correlation"

3. Add these as the IEP allows

- Read-aloud · extended time · separate setting
- Printed slides · videos paused at the "look for" part

4. What to grade

- Progress tracker check-offs: use the notes in place of each L1.x worksheet
- **Notes**: same points as his worksheets for that lesson when complete.
- **Quiz**: score, then scale to the class points.
- These are **modifications** (less content). The IEP must allow modified grading. Check with the case manager.

5. Who to ask

- Mr. Driver (SLE): changes and IEP questions.
- Facts we could not confirm in her files say "check with Mr. Brittle".
