📖 Charges & Static: Vocabulary Picture Cards (Level 2)

Name: _____

Cut on the dashed lines. Use the cards to match, sort, or quiz a partner.

⚡

Lightning

A giant electric spark between a cloud and the ground (or two clouds).

⚛️

Atom

The tiny particle that all matter is made of.

➕

Proton

A positive (+) particle in the center (nucleus) of an atom. It does not move.

➖

Electron

A negative (−) particle around the nucleus. Electrons can move from one object to another.

Neutron

A particle in the nucleus with no charge (neutral).

Static charge

Extra or missing electrons that build up on an object, like a rubbed balloon.

Neutral

An object with the same number of protons and electrons, so it has no overall charge.

Correlation

Two things happen together. It does not prove one causes the other.
