Chemistry · Unit 1B · Level 1

Electric Forces

TODAY'S PLAN

- 🧲 Pull together
- ↔️ Push apart
- 📏 Closer is stronger
- 🎈 Balloon and paper

Review · 5 minutes

Quick Review

⚛️ Atoms have **plus** ➕ and **minus** ➖ parts.

🎈 Rubbing moves **electrons**.

👉 Point: electrons are ➕ or ➖?

Words to Know

Words to Know

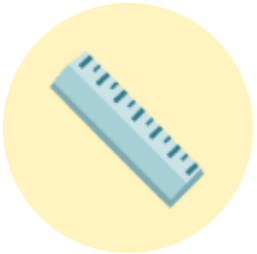

Attract
pull together

Repel
push apart

Electric force
a push or pull from charge

Distance
how far apart

Compare

Pull or Push?

🧲

Opposites pull

attract

🔁

Same ones push

➖ and ➖

repel

🃏 Check 1 of 4

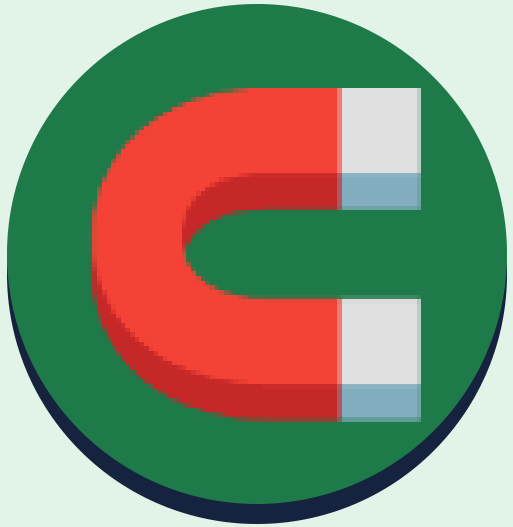

➕ and ➖ will...

Point to the picture!

↔️ Push apart

🧲 Pull together

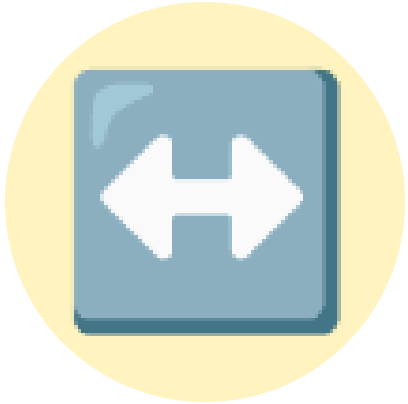

✅ Answer · Card 1 of 4

Pull together

Opposites attract.

Check 2 of 4

▬ and ▬ will...

Point to the picture!

↔️ Push apart

🧲 Pull together

✅ Answer · Card 2 of 4

Push apart

The same charges repel.

Compare

Closer Is Stronger

🤜

Close

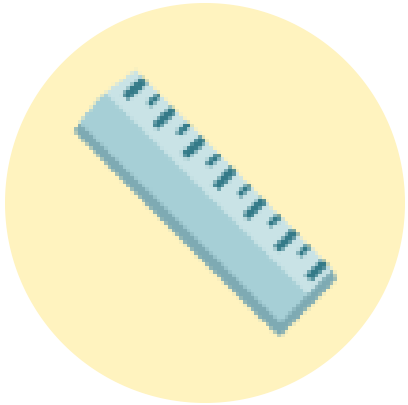

strong pull 💪

↔️

Far

weak pull

🃏 Check 3 of 4

Which pull is stronger?

Point to the picture!

🤏 Close together

🏃 Far apart

✅ Answer · Card 3 of 4

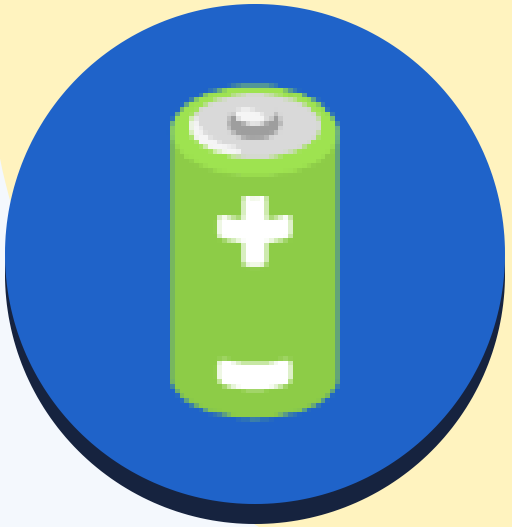

Close together

Closer = stronger.

Compare

More Charge Is Stronger

🎈🎈

Rub a lot

more charge
strong pull 💪

🎈

Rub a little

less charge
weak pull

Which balloon pulls harder?

Point to the picture!

😴 Rubbed a little

💪 Rubbed a lot

✅ Answer · Card 4 of 4

Rubbed a lot

More charge = stronger.

Learn

Balloon and Paper

🎈 A charged balloon can pull **paper** and **hair**.

🙌 It does not even **touch** them!

🧲 The force works **through the air**.

Wrap-Up

Recap

Opposites
pull together
